

We've got a new name!

Entering A New Era...

With quality and service a number one goal, J. Murphy Sheetmetal will enter a new era as it prepares for a name change as of July 1.

Faces of new era...Jim Murphy, Gino Pacquola, Steve Snelling, John McIntosh and Ian Scott make up the professional team at Snelling Engineering.

STEVE and Sandra-Lee Snelling purchased J. Murphy Sheetmetal from Jim and Mary Murphy almost a year ago, and to celebrate their first year in business, they are changing the name of the company to Snelling Engineering.

"Snelling Engineering will still have the same team of highly motivated, skilled and professional tradesmen, and deliver excellent customer service and quality of workmanship that J. Murphy Sheetmetal provided," said Steve.

"I have plans of growing

Snelling Engineering over time to increase and improve our service to our clients, but would like to take this opportunity to thank Jim and Mary Murphy and all our clients for their support over the past 12 months and look forward to the future."

Previous owner, Jim Murphy congratulated Steve on establishing his own business identity.

"Steve has diversified the business a lot over the past 12 months, he is a big believer in providing the client a full service for all their requirements, and it's great to see Steve taking on his own

identity with Snelling Engineering. I wish him all the best and look forward to playing a continuing role in the business" said Jim.

Snelling Engineering provides a wide range of services; pressing and guillotining, aluminium, stainless steel and general fabrication, sheetmetal fabrication and forming, on-site maintenance and installation and sheet steel sales from off-cuts to full sheets.

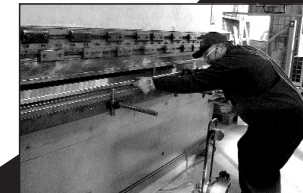

So for reliability, quality and service give Steve or Jim a call at Snelling Engineering, located at 27 Lockwood Road, Shepparton. Ph: 5821 0776.
